## ISN RFID Vehicle Access

- Most convenient for Residents due to fast, forward facing technology.
- Flexible deployment of readers on either side of vehicle or above on a parking garage
- Readers require no maintenance for reliable operation and have a low replacement cost
- Long range vehicle identification with the ability to order readers adjusted to a shorter range.
- The large read cone of 25+ feet quickly and reliably recognizes the tags as they approach.
- Radio based RFID system goes through, heavy rain, frost or snow.
- Our elegant and flexible tag design does not detract from the look of a nice car.
